Date: 09 November 2026 | **Time:** 08:00 – 17:00 | **Venue:** ADNEC Concourse (Gate G - J)

ONE-DAY INTERACTIVE PRACTICAL WORKSHOP

Discover how military and civilian organizations work together to manage Chemical, Biological, Radiological, Nuclear and Explosive (CBRNE) incidents through realistic, scenario-based training led by international experts.

WHY ATTEND?

This is not a lecture. It is a fully immersive, hands-on workshop where participants rotate through realistic operational stations and practice the essential skills required during a CBRNE incident.

Learn directly from military, emergency medicine, CBRN, civil defence, and industrial response specialists.

WORKSHOP HIGHLIGHTS

MILITARY & CIVILIAN PPE

- Experience and compare:
- Military MOPP Levels
- Civilian PPE Levels A–D
- Donning & Doffing techniques
- Modern CBRN detection technologies

HOT ZONE CASUALTY MANAGEMENT

- Practice lifesaving interventions including:
- Tourniquet application
- Nerve agent autoinjectors
- Spot decontamination (RSDL)
- Casualty masking
- Soldier CBRN bag utilization

EMERGING TECHNOLOGIES

- Experience demonstrations of:
- AI-supported CBRN triage
 - Military CBRN detection equipment
 - CBRN drones
 - Advanced response technologies

MOBILE DECONTAMINATION SYSTEMS

- Explore two operational systems:
- Containerized decontamination unit
 - Conveyor-based decontamination tent
- Participants will perform the complete decontamination process under instructor supervision.

TACTICAL DECONTAMINATION & TREATMENT

- Observe and participate in:
- MARCH² management of contaminated unstable casualties
 - Tactical treatment area operations
 - Casualty evacuation
 - Patient isolation transport systems

WHO SHOULD ATTEND?

Military and civilian healthcare professionals including:

Physicians	Nurses	Combat Medics	Paramedics	EMTs	Civil Defence Personnel
CBRN Officers	HazMat Teams	Disaster Medicine Professionals	Industrial Emergency Response Teams		

40 participants

EDUCATIONAL FORMAT

- Interactive lectures
- Live demonstrations
- Four immersive OSCE stations
- Hands-on skills practice
- Multinational faculty
- Military–Civilian interoperability
- Real operational equipment
- Scenario-based learning

WORKSHOP PARTNERS

- United Arab Emirates Armed Forces
- French Military Medical & CBRN Teams
- ADNOC Emergency Response
- Abu Dhabi Civil Defence Authority
- Prometheus Training Team

REGISTRATION FEE: USD100 PER PARTICIPANT
TRAIN TOGETHER. RESPOND BETTER. SAVE MORE LIVES.
